

# BY 2050

our world's  
population  
will surpass.

## 9 billion

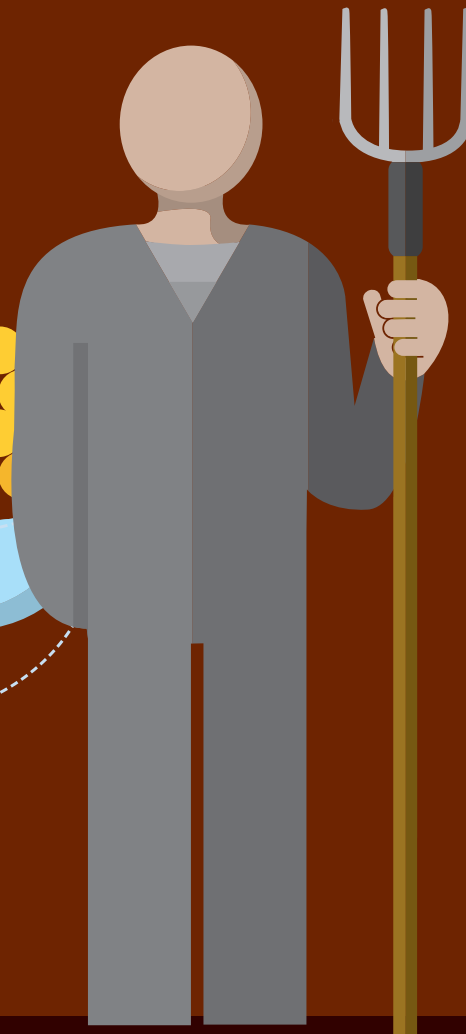

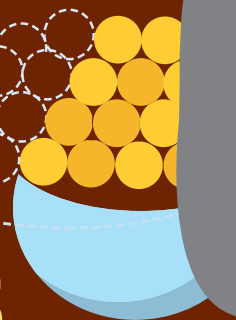

### TOO MEET OUR NEEDS GROWERS WILL

Need to produce more food — as much as 70% more than today — while reducing farming's footprint.

### HOWEVER, OUR WORLD'S CLIMATE IS CHANGING

Rapidly and as droughts, floods and unpredictable weather become more common, it is becoming harder for farmers to grow our food.

70%  
MORE  
FOOD

### WE NEED NEW AGRICULTURAL TECHNOLOGIES

That can help our farmers adapt, become more resilient and meet the growing challenges our world will hand to them in the decades ahead.
