

# BACKPACK SPRAYER MAINTENANCE

## AVOID SPILLAGE AND LEAKS

**1.** Check the condition of the hose

**2.** Check and replace hose clamps that are damaged

**4.** Check and replace gaskets that are damaged

**3.** Check the operation of the shutoff valve

**6.** Choose the appropriate nozzle. Replace nozzle if damaged

**5.** Lubricate the piston seal with light oil

**8.** Wash the sprayer after using it

**7.** Check and replace any damaged valves

### THE BENEFITS OF AVOIDING LEAKS IN THE SPRAYER ARE:

- ✔ Saves you money; does not waste product.
- ✔ Reduces the risk of skin exposure.
- ✔ Reduces the risk of environmental contamination.
